

AGP-4400

ExpressParc®

Exit Pay Credit Card System

Amano McGann's AGP-4400 ExpressParc® Exit Pay Credit Card System accepts entry tickets and validation coupons, calculates parking fees, accepts and processes credit cards, prints and issues receipts. This unit, which interfaces with an on-line credit card host PC for fee calculation and credit card processing, is extremely cost efficient because it reduces the need for cashiers, allowing for effective employee utilization. The need for inventoried parts and service training is greatly reduced because the ExpressParc uses common hardware components.
